

Please, Please, keep the "do not call" list going strong. My mom is going to be 90 years old and was getting so many calls she shut her phone off and I could not contact her. I had to ride almost an hour and call the police to knock at her door and wake her up so I knew she was ok. She is now on the do not call list and now she answers her phone. We do not need people bothering us at all hours of the day and night. Not everyone can have caller ID and all the other added options that add to the telephone bills. Please Keep this "Do not Call" list going strong. I hope there is a do not call for the cell phones too. There are enough interruptions for families. Thank you.
